

Lecture Recorder x2

Lecture Recorder x2™ is Epiphan's next generation portable multi-source audio-visual recording appliance specifically tailored to presentations, events, lectures, training and marketing applications where the presentation display content, the presenter camera and audio are captured synchronized, recorded and streamed to standard browsers and media players.

Lecture Recorder X2 features:

- Portable hardware appliance for recording and streaming presentations, events, lectures, marketing and training videos
- Captures and synchronizes an HD video source, an analog SD video source and an analog audio source
 - HD source: VGA/DVI/HDMI display or camera source, up to 1920 x 1200
 - SD source: S-Video/Composite, NTSC/PAL
 - Audio source: 3.5mm line/mic., stereo/mono
- Non-Intrusive – Simply Plug and Play Audio Visual presentation sources –Secure – no software or networking to install on presentation sources.– OS and CPU agnostic – No 3rd party hosting required, no maintenance fees
- Encodes, Streams, Records to multiple standard formats (e.g. H.264, MPEG4, MJPEG) – HD1080p @30 FPS Standard browsers and media players view live event at a URL as a single stream or two independent streams
- 16GB of internal video recording storage with auto-push to network storage or local USB storage key
- No fans, no noise, reduces power, devices and clutter: integrated with Power over Ethernet, pass-through monitoring with built-in splitter and converter to all three display output types (VGA, DVI, HDMI)
- Multiple start-stop recording controls and peripherals, HTTP and RS-232 API for integration with other systems
- Branding and Layouts – Broad support for multiple display source resolutions and frame scaling. Customize text applied to each frame, layouts, branding graphics
