AXIS M30 Network Camera Series

Fixed mini domes with HDTV and 360°/180° panoramic views.

> Compact, vandal- and dust-resistant design

> Wide angle and 360°/180° panoramic views

> HDTV video quality

> Easy, flexible installation

> Edge storage

AXIS M30 Series addresses the market's need for affordably priced, highly discreet and easy-to-install indoor fixed domes with HDTV performance and 360°/180° panoramic views. They are ideal for retail stores, hotels, schools and offices with tight budgets for video surveillance.

Providing superb video quality, AXIS M30 cameras range from the palm-sized AXIS M3004-V and AXIS M3005-V with HDTV performance, to the wide-angle AXIS M3006-V with 3-megapixel resolution, and AXIS M3007-PV, a 5-megapixel fixed dome that provides a 360° view when ceiling mounted or 180° view when wall mounted.

AXIS M30 cameras are vandal- and dust-resistant, and can be mounted on walls or ceilings. AXIS M3004-V/ M3005-V/M3006-V cameras have a 3-axis camera angle adjustment for flexible installation. The three cameras also support Corridor Format for vertically oriented video streams that maximize coverage of areas such as corridors, hallways or aisles. All AXIS M30 cameras come focused at delivery.

AXIS M30 cameras support AXIS Camera Application Platform for intelligent video applications such as people counting. AXIS M3006-V and AXIS M3007-PV have substantial capacity for video analytics.

The cameras offer a convenient video management solution with their built-in microSDHC memory card slot for edge storage and support for software such as the complimentary AXIS Camera Companion.

Simplifying installation, AXIS M30 cameras come with a 2 m (6.6 ft.) network cable and are powered using Power over Ethernet (IEEE 802.3af).

Affordable, compact and easy-to-install fixed domes with superb video quality

HDTV and multi-megapixel models

AXIS M30 cameras share a discreet form factor and are designed for quick and easy installation. The models—with different viewing angles, resolution, frame rate and intelligent video capacity—have been optimized to provide best-in-class performance for the different application needs of price-sensitive customers.

AXIS M3007-PV has a 5-megapixel sensor that enables detailed, high-quality 360° and 180° panoramic views. AXIS M3006-V not only supports HDTV 1080p but can also provide 3-megapixel video streams with 50% more resolution than HDTV 1080p. With a 134° angle of view, AXIS M3006-V can provide full coverage of an area when installed near a corner. Meanwhile, the palm-sized AXIS M3004-V and AXIS M3005-V provide the smallest form factor. AXIS M3004-V supports full frame rate 1-megapixel/HDTV 720p performance, while AXIS M3005-V delivers HDTV 1080p with more than double the resolution of HDTV 720p.

## Digital PTZ and multi-view streaming

The digital pan/tilt/zoom functionality in all AXIS M30 cameras can be seen as enabling the cameras to have a "digital varifocal lens" that allows the cameras' angle of view to be adjusted remotely after the physical installation. This functionality is especially useful with AXIS M3006-V because of its wide angle of view and high resolution.

When digital PTZ is used together with multi-view streaming in AXIS M3006-V, different areas of a scene can be cropped from the full view and streamed simultaneously for viewing or recording. Multi-view streaming simulates several virtual cameras and can help minimize the bit rate and storage needs.

360°/180° fixed domes

AXIS M3007-PV is a 360°/180° fixed dome that can cover an area of more than 650 m² (7,000 sq. ft.). It can be used to help detect activities, track the flow of people and improve area management.

AXIS M3007-PV supports several viewing modes: 360° overview and dewarped views such as panorama, double panorama and quad views. The quad view mode is suitable, for instance, when the camera is positioned at an intersection of corridors. The camera also provides view area modes where users can digitally pan, tilt and zoom in on areas of interest.

3-axis camera angle adjustment

AXIS M3004-V/M3005-V/M3006-V cameras have a 3-axis camera angle adjustment that enables users to:

> mount the cameras on walls or ceilings
> easily adjust the cameras' direction
> easily level the image
> get vertically oriented video streams (Axis' Corridor Format)

Axis' Corridor Format is achieved when the 3-axis camera angle adjustment is used together with the camera interface's ability to rotate the image. The format optimizes the coverage of areas such as aisles, hallways and corridors, maximizing image quality while eliminating bandwidth and storage waste.
