MioCARE Z100

The world's first tablet designed for medical professionals

1 Pocket sized with 6" screen
Ergonomically designed tablet developed in healthcare environment. Handheld, responsive and light.

2 Secure environment
Mio have developed a suite of complementary solutions to provide varying security options. These range from full two factor smartcard authentication and access logging to simple log on solutions for non clinical use.

3 Infection control
Polycarbonate coated to support healthcare infection control procedures.

4 Flexible & Programmable
Mio is available to help integrate your own apps and solutions to the MioCARE environment providing you with full flexibility around the final solution and maintenance without obligation.

This allows the device to be used to open new revenue streams with solutions including dictation, logistics, tracking and HIS.

Our experienced development team makes the best use of screen space, battery life, security and speed by developing native apps in an open buy dedicated environment.
