1. Introduction

The Grand Video Console Plus II is a Video to VGA converter that allows you connect your video source devices such as DVD player, video camera or video game to your VGA monitor with outputs up to 1920x1080.

The Grand Video Console Plus II supports both composite and s-video inputs. It is easy to connect your video source without any software installation, and instantly switch the source between PC, composite and S-Video using the remote control or panel buttons.

The powerful POP (picture on picture) function allows you to use your computer as usual while monitoring the video input.
