

# VGA Broadcaster

VGA Broadcaster is a web presentation product that broadcasts a visual signal received from any VGA port.

It provides a simple and cost-effective web presentation solution for trainers, tech support, conferences, enterprises, sales staff, distance education providers and more.

#### **VGA Broadcaster is:**

**Simple** - just plug it in and present. No scheduling or prior set-up is required. No firewall arrangements need to be made. And, there is no software to download or user interface to learn.

**Low-cost** - with VGA Broadcaster, you own the web presentation capability outright. There are no setup or usage fees and it accommodates unlimited numbers of participants. It is three to four times less costly than WebEx or LiveMeeting solutions.

**Versatile** - VGA Broadcaster works with any operating system, including Linux/Unix, Windows and Mac. It is also the only solution of its kind to transfer images from most web cameras, cursors or any other objects generated on the screen by DMA.

## VGA Broadcaster Connection Diagram

The VGA Broadcaster has inputs for VGA, composite video, as well as 3.5mm unbalanced audio. Optionally, VGA Broadcaster may also be fitted with 1/4" balanced TRS audio inputs.

Comprised of a 4U rack-mount enclosure, Epiphan's VGA Broadcaster synchronises a high-resolution VGA stream at up to 30 frames per second with an analog video and audio stream and broadcasts it to the Internet in real time.

VGA Broadcaster is Epiphan's most powerful enterprise-oriented broadcasting solution and can be customized for specific applications. Please contact Epiphan Systems or your reseller for customization options.
